

**Specifically Designed for  
Power Pre-Stretch  
Wrapping Machines with  
Pre-Stretch ratio up to 180%**

## The unstoppable stretch film

*Place it & Forget it!*  
**Zero film breaks during the wrapping process**

### FOR MACHINE USE

**Fiber Film** is a unique high-efficiency stretch film with reinforcement elements (fibers) that increase Tear Resistance. **Fiber Film Beta** is specifically designed for **Power Pre-Stretch Wrapping Machines** and performs up to **180% Pre-Stretch**. All grades of Beta family not only offer **excellent pallet stability**, but also significant **cost per pallet savings**. Fiber Film Beta consists of three (3) main categories:

For **High Demanding (HD)** applications is designed to usually replace a stretch film of 23µm thickness or higher.

**23µm+**

For **General Purpose (GP)** applications is designed to usually replace a stretch film of 18µm to 22µm thickness.

**18µm to 22µm**

For **Light (L)** applications is designed to usually replace a stretch film of 17µm thickness or less.

**17µm-**
